Introduction

- A portfolio should really tell us who you are. Portfolios are a visual or sometimes digital representation of someone's work. it's the place where you show people what you're about and what you're interested in.

- You can show video you can show audio you can show drawing painting sculpture whatever it is something that you're proud of.It can be a range of different types of work it can be a range of different techniques but really we want to see who you are as an artist designer maker.

- it's really about cherry-picking the things that students are most proud of that they can really think of this. This represents Who I am as a person and where I want to go & what things I want to develop them progress further. I think of a portfolio as a visual diary & if you're writing a diary you can't do it in a day it takes place over time.

Why is it important to have a portfolio website?

- Portfolios are a great way to demonstrate the competencies you would list on a resume or talk about in an interview — they allow you to show and not just tell.

- During a job search, the portfolio showcases your work to potential employers.

- It presents evidence of your relevant skills and abilities.

Why are portfolios important for students?

- Portfolios can encourage students to take more ownership and responsibility over the learning process.

- In some schools, portfolios are a way for students to critique and evaluate their own work and academic progress, often during the process of deciding what will be included in their portfolios.

- Student portfolios are most effective when they are used to evaluate student learning progress and achievement.

5 Benefits Of Creating An Online Portfolio

1. **PROFESSIONAL WAY TO SHOWCASE YOUR WORK.**

2. **IT'S A GREAT FIRST IMPRESSION FOR EMPLOYERS.**

3. **INCREASES YOUR VISIBILITY AND ONLINE PRESENCE.**

4. **SHOWS YOU'RE MORE THAN JUST A RESUME.**

5. **FLEXIBILITY**
